EMEET SmartCam C960 4K Webcam

The EMEET SmartCam C960 4K webcam is designed for users who expect the highest image quality and reliable communication regardless of conditions. Equipped with an advanced Sony sensor and Ultra HD 4K resolution, it offers exceptional detail and natural image reproduction during video conferences, streaming, or online learning. Smart features such as automatic light correction and precise PDAF autofocus ensure you look your best in any situation. Additionally, two noise-canceling microphones deliver clear, crisp sound, while broad compatibility and plug-and-play support make using the camera quick and hassle-free. It's a versatile solution that combines convenience, security, and professional results.

Details that make a difference

Ultra HD 4K resolution delivers four times the detail of standard HD cameras, resulting in a clearer, more realistic image. The Sony sensor delivers natural colors, high sharpness, and excellent quality even in dynamic scenes. This makes the camera ideal for online meetings, creative work, live streams, and video recordings where every detail counts.

Proper lighting in any conditions

The built-in automatic light correction feature adjusts image settings in real time, ensuring you always look your best—whether you're working in a dimly lit room or under bright daylight. The camera intelligently balances exposure and contrast, eliminating the problem of overexposure and underexposure. An advanced autofocus system based on PDAF technology ensures fast and stable focusing. The camera automatically adjusts focus to the face of the person in front of it, eliminating blurring and ensuring a professional appearance during every call or recording

Clear and crisp sound thanks to noise reduction

Two built-in microphones with an advanced noise-reduction algorithm effectively eliminate ambient noise, allowing the listener to focus on what you're saying. Your voice remains natural, clear, and easily audible even in less-than-ideal acoustic conditions, significantly enhancing the comfort of communication during online meetings, webinars, or remote lessons.

Flexibility with attention to detail

Thanks to an 180° adjustable base, a 360° rotating head, and a universal 1/4" thread, the camera offers great flexibility in positioning. It can be mounted on both a monitor and a tripod, adjusting the position to suit your needs and workspace. What's more, the camera features a 73° field of view, ensuring an optimal shot of your face and silhouette while keeping you centered in the frame. This makes it ideal for individual work where a professional presentation and a distraction-free background are essential.

Ready to go in seconds

Setting up the camera is extremely simple—just connect it to your computer via a USB cable to start working immediately. There's no need to install drivers or distinguish between USB 2.0 and 3.0

standards, as the camera delivers high-quality 4K video in both cases, significantly simplifying setup. For added security, the camera is equipped with a physical lens cover that can be easily slid over the lens when the device is not in use.

Wide compatibility and smart management

The camera is designed for full compatibility with popular operating systems and communication platforms, enabling seamless operation across various devices and environments. Additionally, the EMEETLINK app allows for convenient management of settings, parameter changes, and software updates, enabling the camera to continuously expand its capabilities and adapt to your needs.

Included in the package

- webcam
- privacy cover
- tripod
- user manual

Manufacturer	EMEET
Model	C960
Maximum resolution	4K at 30 frames per second
Field of view (FoV)	73°
Autofocus type	PDAF
Focusing type	Autofocus with PDAF technology
Focus range	20-300 cm
Video codec	YUY2 / MJPEG
Image sensor	Sony sensor
