EMEET SmartCam C980Pro 4K Webcam

Online meetings, training sessions, consultations, and business calls reach a professional level with the EMEET C980Pro 4K webcam. The device combines high image quality with an advanced audio system, offering clear audio and natural detail reproduction. Thanks to its flexible design and wide field of view, it adapts to various usage scenarios, from individual work to group calls. Built-in microphones and speakers ensure comfortable communication without additional accessories, while thoughtful design solutions enhance the convenience of everyday use.

High-quality image with a Sony sensor

Image quality is ensured by a high-end Sony sensor, which delivers a detailed, sharp image in 4K resolution. The camera performs excellently in both office work and more demanding applications,

such as medical consultations, e-learning, or multi-participant video conferences. Natural color reproduction and high detail ensure that every frame looks professional and clear, which is particularly important during presentations or conversations requiring precise communication.

Adjust the frame to your needs

The adjustable field of view ranging from 60 to 98 degrees allows you to easily adapt the frame to the current situation—from a narrow shot focused on a single person to a wider shot covering a larger space or several people. This solution works well for one-on-one meetings, teamwork, and online classes. The ability to change the viewing angle gives you greater control over how you are perceived by your conversation partners.

Comprehensive audio system

The built-in system, consisting of four microphones and two 1W speakers, makes the camera a complete communication tool. The 81 dB sound is clear and easily audible, eliminating the need for additional audio devices. This solution enhances your work experience and allows you to focus on the conversation, whether you're conducting a business meeting, an online class, or a consultation.

Flexible mounting and convenient adjustment

Support for USB 2.0 and USB 3.0 standards ensures a stable and fast connection to your computer, without unnecessary complications during setup. Plug-and-play installation means the camera is ready to use immediately after connecting. Additionally, you can mount it directly on the screen using an adjustable clip or place it on a tripod (sold separately), offering greater flexibility in setting up your workspace. The design allows the camera to tilt 90 degrees and the clip to rotate 180 degrees, making it easy to set the optimal recording angle in any situation.

Privacy and Thoughtful Details

The magnetic lens cover makes it easy to ensure privacy when the camera is not in use. Every element of the design has been crafted to combine functionality with user comfort and aesthetics, creating a tool tailored to the modern work style.
