Product Code: 659699

R2,672

EMEET SmartCam C960 Ultra Webcam

The EMEET SmartCam C960 Ultra webcam is equipped with a large 1/1.5" Sony sensor that captures video in 4K UHD at 30 fps and Full HD 1080p at 60 fps. A bright F/1.8 lens, fast PDAF autofocus that works in about 0.2 seconds, and two built-in microphones ensure clear video and crisp audio during video conferences, live streams, and recordings. The camera offers a natural bokeh effect, works with EMEET Studio software, features an aluminum housing, and is ready to use once connected via the included USB-C cable and USB-A adapter.

Large Sony sensor ensures a clear image

At the heart of the camera is a 1/1.5" Sony CMOS sensor, which captures more light than standard sensors used in webcams. As a result, the image retains high detail, natural colors, and better quality even in low-light conditions. This solution works well for both everyday video calls and video production.

4K recording and smooth Full HD video

The model supports recording at 3840 × 2160 resolution at 30 fps and Full HD 1920 × 1080 at 60 fps. The high resolution lets you capture more detail, while the higher frame rate ensures smoother video during streaming, presentations, and dynamic online conversations.

Instant autofocus and natural framing

PDAF technology focuses in about 0.2 seconds, allowing the camera to quickly respond to changes in distance and keep the user in the center of the frame. Additionally, the 73° field-of-view lens ensures natural framing without the distortion typical of ultra-wide-angle cameras. This makes the camera well-suited for business meetings, live streams, and solo recordings.

Good image quality even in low light

The combination of a large sensor and a bright F/1.8 lens helps reduce noise and maintain a clear image even in dimly lit rooms. The camera effectively utilizes available light, eliminating the need for additional lighting in many everyday situations.

Natural bokeh effect

The large sensor enables a natural background blur, which helps better highlight the person in front of the camera. This effect looks more realistic than digital blurring, giving your recordings and live streams a more professional look.

Clear sound thanks to two microphones

The EMEET SmartCam C960 Ultra is equipped with two built-in microphones that deliver clear and natural sound during online calls, business meetings, and video recordings. This eliminates the need for an additional microphone in everyday use.

More possibilities with EMEET Studio

The camera works with the EMEET Studio software, which allows you to adjust image settings and use additional features. Users can crop the image, prepare whiteboard presentations, create desk-view shots, use more precise background removal, and record vertical-format content for platforms like Shorts, Reels, or TikTok.

Aluminum Construction

The aluminum alloy housing increases the device’s durability and aids in heat dissipation during operation. The minimalist design blends well with modern computer setups and monitors.

Simple Installation and Wide Compatibility

The camera operates on a Plug & Play basis, so it’s ready to use as soon as it’s connected to a computer. The package includes a 1.5-meter USB-C to USB-C cable and a USB-C to USB-A adapter, making it easy to connect to various devices. The camera is compatible with Windows (64-bit) and macOS 10.14 and later, but does not support Windows computers running on ARM architecture.

Included in the package

- EMEET SmartCam C960 Ultra webcam
- 1.5 m USB-C to USB-C cable
- USB-C to USB-A adapter
- Quick Start Guide
- User Manual
- Warranty Card

Manufacturer	EMEET
Model	SmartCam C960 Ultra
Image Sensor	Sony 1/1.5" CMOS
Maximum Resolution	3840 × 2160 (4K) at 30 FPS
Full HD Resolution	1920 × 1080 at 60 FPS

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Available encoding formats	MJPEG, YUY2
Aperture	F/1.8
Autofocus	PDAF (approx. 0.2 s)
Field of view	73°
Microphones	2 built-in
Software	EMEET Studio
Interface	USB-C
Cable length	1.5 m (USB-C to USB-C)
Mounting thread	1/4"
Compatibility	Windows (64-bit, excluding devices with ARM processors) and macOS 10.14 and later
Minimum hardware requirements	Intel Core 2 Duo 2.4 GHz processor or newer, at least 2 GB of RAM, USB 2.0 port
