R34,068

The Lanberg FF01-8242-23BL V2 Single-Section Standing Rack Cabinet is the ideal solution for professional installers who build networks, perform cable installations, and install 19" equipment. This reliable rack cabinet offers a big capacity, ensuring the solidity and safety of your installations. The rack cabinet is specially designed for data centers that require ample space for equipment in cabinets. It works perfectly in extensive networks and server rooms, catering to small, medium, and large companies as well as corporations. Additionally, it is an excellent choice for low-voltage installations such as cable TV networks, alarm systems, fire systems, access control, CCTV, and IP surveillance systems.

The cabinet's construction is made of high-quality rolled steel, providing excellent design and craftsmanship. It features adjustable depth of vertical mounting rails, allowing for customization to accommodate various types of equipment. It comes equipped with grounding accessories, including

a cable and nuts. The grounding pins are present in three parts of the cabinet - frame, front doors, and rear doors, ensuring comprehensive grounding of your installations. The Lanberg cabinet also includes lockable top and bottom panels with blanking panels, enabling convenient cable entry and concealment. This ensures a neat and well-organized installation, minimizing cable clutter. Additionally, the cabinet is equipped with perforated front and rear doors. It offers the option for right or left-side door installation. The side panels are removable, and the rear doors are made of solid steel with a lock. The cabinet also features a front-mounted LCD display with a thermostat function, displaying essential information such as the internal temperature, current time, and fan status.
