Manufacturer: CELLY

EAN: 8021735201199

Product Code: 662262

R951

GHOSTMAGPRO is a magnetic car mount made of aluminium, compatible with the MagSafe magnetic alignment of the latest iPhone models, from 12 onwards. The renewed design with an aluminum structure makes it more performing in terms of stability and grip. When you place your iPhone onto the holder, the circular magnet will automatically hook onto the device's magnetic module and lock it securely in place. Thanks to the super resistant adjustable clip equipped with an anti-fall system, you can safely attach the GHOSTMAGPROBK to the airvent of your car. It's compatible with most airvents. The head has a 360° rotation to allow you to adjust the holder to the best angle. The magnetic fixing system is specially designed to work with the latest iPhone models and is therefore completely safe and does not interfere with the smartphone. Included in the box an additional metallic plate to increase the grip of the holder if you have a sporty driving or if you want to use the holder also with other smartphone models.
