LiberNovo StepSync Footrest (Black)

The LiberNovo StepSync is an ergonomic footrest compatible with all LiberNovo chair models, designed to enhance comfort during long hours of desk work and moments of relaxation. The ergonomic angle (10°) promotes proper leg positioning and improves circulation, helping to reduce fatigue. The product offers two height settings, allowing it to be adjusted to the user's height (153–185 cm). The stable construction, high-quality materials, and the ability to use the footrest even when the chair is reclined up to 160° ensure comfort both while working and resting.

Greater comfort and better ergonomics

The footrest helps keep your feet in the correct position, thereby improving weight distribution while sitting. Full foot support helps reduce pressure on the sit bones, buttocks, thighs, and the back of the knees, while promoting better circulation. This feature will be especially appreciated by those who spend many hours in front of a computer.

Comfort while working and relaxing

StepSync works well not only during daily work but also while resting. Combined with the chair's 160° recline, it allows you to assume a position resembling weightlessness, providing comfortable leg support and greater comfort.

Included:

- Footrest platform
- Base
- Support column
- Height adjustment adapters
- Adjustment knob
- Leg rest
