Why the BenQ Ergo Arm?

BenQ understands your desire for a clean desk and the difficulty of finding a reliable computer monitor arm with the right weight capacity.

Stability and Durability You Can Rely On

That's why we designed this arm for best-in-class stability with a 44 lbs. capacity and a premium spring mechanism to prevent shaking, sinking or sagging. The package includes a durable Reinforcement Plate that distributes the arm's weight across your desk surface, protecting it from scratches, cracks, and deformation over time.

Effortless Setup for Seamless Productivity

Now, just pick the perfect spot for your monitor and let us handle the rest. It's an effortless, no-brainer choice that ensures you'll never have to worry about compatibility or performance again. Enjoy a clutter-free, seamless desk setup with the ideal monitor arm!

Adjustment Range

For dual monitor arm, larger monitors may limit adjustment range. Ensure adequate spacing to prevent collisions.

- Tilt Range: +50°~-20°, Height Adjust: 8.7''~18.7''
- Extension: 22.4'' (56.8cm)
- Rotation: +180°~-180°

Recommended Dual Arm Setups

itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Designed to support monitors weighing up to 44 lbs and measuring 45 inches or smaller, with standard VESA mounting holes (75x75 mm or 100x100 mm).

Tabletop Thickness

Suitable for tabletops between 1.7 and 5 cm without a reinforcement plate, or between 1.2 and 4.5 cm with a reinforcement plate.

Tabletop Material

Compatible with most materials. For hollow tabletops, honeycomb boards, MDF, or glass surfaces, a reinforcement plate is required to ensure a stable installation.
