

Mars Gaming MF-NC Computer case Fan 12 cm White 1 pc(s)

Model: MFNCW

Manufacturer: MARS GAMING

EAN: 8435693104858

Product Code: 669658

R1,119

Discover the ultra-quiet 120mm MF-NC fan with hyper-balanced copper FDB bearing, a marvel of cooling engineering. With professional hybrid blade design and PWM technology, it delivers maximum airflow and static pressure with precise speed control, ensuring optimal performance and ultra-quiet acoustics.

HYBRID BLADE DESIGN

The MF-NC PC fan blades are a masterpiece in design and functionality. With ultra-thin edges, these hybrid blades are able to maximize airflow and static pressure, resulting in superior cooling. They are especially suited for systems that feature high resistance such as CPU coolers, liquid cooling radiators or cases with tight vents, ensuring exceptional heat dissipation, making it the perfect ally for your setup.

AVAILABLE IN TWO VERSIONS BLACK OR WHITE

Choose the one that best suits your setup.

FDB HYPERBALANCED COPPER BEARING

The essence of this fan is its hyper-balanced copper FDB bearing, the secret to stable, silent and safe rotation. This advanced design not only improves the efficiency of the fan, but also significantly extends its lifespan. It is the ideal solution for those looking for long-term reliability and simplicity.

TOTAL CONTROL. PWM CONNECTION

Experience unrivaled control with the MF-NC fan's PWM switching. This advanced technology allows you to adjust the fan speed between 800RPM and 2300RPM, adapting to your system's cooling needs instantly. With the PWM switching system, the MF-NC perfectly balances performance and silence, optimizing power consumption and maximizing efficiency.

SILENT AND STABLE OPERATION

With anti-vibration pads and a sturdy frame, the MF-NC fan promises ultra-quiet and stable operation. These elements minimize vibrations, ensuring nearly imperceptible operation. Plus, with less than 1mm clearance between the blade tips and the frame, airflow loss is reduced and airflow efficiency is maximized. Perfect for both quiet offices and intense gaming sessions, this fan maintains its performance without sacrificing quietness.
