

Mars Gaming MT1 PC Thermal Paste 3g 9W Temperature 50- 250° Maximum Security

Model: MT1

Manufacturer: MARS GAMING

EAN: 4713105963199

Product Code: 670955

R993

The MT1 includes 3 grams of product for total cooling. With great thermal conductivity and temperature support of up to 250°C, you can play without limits.

Large size

The 3 grams of product included in the MT1 have been designed to last and offer the cooling power of this great thermal paste whenever you need it.

High performance

MT1 thermal paste supports temperatures up to 250°C. Thanks to its 9W of thermal conductivity, MT1 keeps your processor's temperature stable. Play for hours without worrying about the temperature!

Perfect filling

The MT1 offers a higher viscosity, which, together with its applicator, makes your thermal paste spread smoothly. Get a perfect filling between the heatsink and the processor. In addition, its low evaporation and support for extreme temperatures guarantee a long product life.

Total security

The MT1 is made from materials that do not conduct electricity, to ensure complete safety for your computer.
