R1,248

DISCOVER GENESIS OXID 260

It's easy to overheat a laptop when playing new and demanding video games. The Genesis Oxid 260 cooling pad comes to the aid of overheating gaming machines. It is more efficient and offers more angle adjustment options compared to its predecessor, the highly acclaimed Oxid 250 model. Its modern and unique design will be a great addition to any gaming enthusiast's setup.

TAKE CARE OF YOUR DEVICE'S TEMPERATURE

Genesis Oxid 260 is designed for laptops with a screen size of up to 17.3 inches. The metal panel with front-facing perforations ensures effective airflow circulation, while the rubber base support secures your mobile computer, preventing it from sliding on the pad's surface and protecting it from accidental falls.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

EFFICIENT FANS

The Genesis Oxid 260 cooling pad features four large fans for efficient cooling. Their positioning guarantees uniform cooling of your laptop, and depending on the workload and heat generated by the device, you can choose the optimal fan speed.

MODERN APPEARANCE

Oxid 260 not only provides effective laptop cooling but also boasts a stylish appearance. Its gaming character is emphasised by aggressively angled lines and red illuminated fans. This cooling pad perfectly complements the modern aesthetic of your setup.

BUILT-IN USB HUB

Don't worry about losing a USB port due to the cooling pad. Genesis Oxid 260 comes with an additional USB-A port, allowing you to connect the cooling accessory without sacrificing limited USB ports.

8 ADJUSTABLE ANGLES

Unlike the previous model, Oxid 260 offers not just four but eight levels of angle adjustment. This means you can customise the laptop's position according to your preferences, ensuring that long hours of work are not only efficient but also comfortable.
