R924

Product information "USB 2.0 audio adapter, USB-A/M to 2x 3.5 mm/F, virtual 5.1 surround sound, black" from LogiLink

The LogiLink USB sound card provides an easy way to connect speaker, microphone, headset or IP phone with your PC. It is connected with the USB port of your computer as needed and supports Plug and Play. Using the integrated 3D sound effects the adapter can simulate a surround sound. The status of the connected devices can be monitored via the LED indicator lights.
