

ATEN 10 M USB 3.2 Gen1 Extender Cable

Model: UE331C

Manufacturer: ATEN

EAN: 4710469342097

Product Code: 690446

R3,235

The UE331C is a USB 3.2 Gen 1 extender cable for adding 10 m to the connection between a USB Type-A enabled PC / laptop and a USB-C device. With the support of up to 5 Gbps Super Speed data transfer rates, the UE331C is backward compatible with USB 2.0 and 1.1 standards, ensuring reliable data communication.

Deployment is made more flexible thanks to its lightweight, small form factor with plug-and play design, along with the multiplatform support, including Windows and macOS. The 2 screw holes on the USB-C female connector fulfill the increasing demands for secure interconnection in industrial applications. The UE331C is an ideal solution when it comes to lengthening USB connection while keeping fast, reliable data syncing performance.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
