

Flytec V801 12000mah bait boat

Model: V801-12000mah

Manufacturer: FLYTEC

EAN: 5907085523989

Product Code: 698314

R3,280

Flytec V801 12000mah bait boat

Increase your chances of successful fishing. The Flytec V801 groundbait boat is the perfect companion for any longer fishing trip. With a control range of up to 500m and a 12,000mAh battery, you can get your groundbait to where the fish are most active - even in the hard-to-reach places. Three independently controlled chambers hold up to 2 kg of groundbait in total, allowing you to spot-bait, mix different types of groundbait or spill gradually depending on your tactics. LED headlights and taillights provide excellent visibility even after dark, and the sturdy design can handle even 7-8° Beaufort winds. The kit includes a remote control.

More options for baiting

The Flytec V801 offers up to three separate silos that you can control from the remote control. This gives you the ability to accurately plan your baiting - from filling one point to spreading your bait over a larger area. A total load capacity of 2 kg means fewer courses and more time to fish. —

Stable control over long distances

The state-of-the-art 2.4 GHz remote control system guarantees a stable connection without interference and allows precise maneuvering over distances of up to 500 meters. Thanks to the ergonomic remote control with a joystick and buttons to operate each of the chambers, you can enjoy full control over the unit - smoothly turn, stop and dump the groundbait exactly where you need it.

Convenience during long hauls

With one button you activate the constant speed cruise mode, which allows the boat to maintain a steady course without having to constantly operate the controller. Such a solution is great during long hauls or in unfavorable weather conditions, when you want to have your hands free to prepare more sets.

Energy for many hours

The 7.4-volt, 12,000mAh lithium battery provides up to 4 hours of operation on a single charge. A charge level indicator on the hull lets you know its status, giving you peace of mind that you'll always have time to get back to shore before it discharges. The time it takes for the device to renew its energy is about 8 h, so the boat is ready for another sit-in the next day.

Safety also at night

The front headlights and rear LED lights greatly improve visibility and make it easier to navigate in the dark. In addition, bright directional lights make the boat clearly visible even in fog, increasing safety and precision during night sessions.

Powerful drive and protection against snagging

Two powerful engines ensure adequate speed and confident maneuvering even in stronger gusts of wind or light waves. In addition, a double, thickened propeller cover protects the drive from grass and other debris, extending the life of the motors and ensuring trouble-free operation.

Full control over the fishery

Flytec V801 boat allows not only to distribute bait, but also to tow leaders or bait nets. Such a solution allows you to precisely deliver bait in the center of the baited area, increasing the efficiency of the sit-in and the chance of record specimens.

Included:

- Bait boat
- Remote control
- 7.4 V 12,000 mAh rechargeable battery
- USB cable for charging
- Propeller x2
- User manual

Manufacturer	Flytec
Model	V801-12000mah
Payload	up to 2 kg
Dimensions	49 × 26.4 × 28.1 cm
Control range	up to 500 m
Operating time	approx. 4 hours
Charging time	approx. 8 hours
Rechargeable battery	7.4V 12,000 mAh
Frequency	2.4 GHz
Remote control power supply	2 × AAA 1.5V battery (not included)
Minimum user age	14+
Material	ABS + electronic elements
Color	Black
