R3,280

OneOdio OpenRock Link 20 Wireless Headphones (black)

The OneOdio OpenRock Link 20 are 2-in-1 open-ear wireless headphones designed for a variety of uses, from work to training. They are equipped with a magnetic, detachable microphone, 5 built-in microphones with AI for noise cancellation, and 30 mW drivers for clear conversations and rich sound regardless of conditions. They also stand out for their long operating time and lightweight, durable design.

2-in-1 design with detachable microphone

The highlight of the Link 20 is its magnetic, detachable microphone, which allows you to turn the headphones into an office, gaming or sports headset in an instant. Robust, high-quality magnets

guarantee a stable fit in almost any situation. All of this makes one pair of headphones successfully replace several different devices, matching work, entertainment and physical activity.

Ergonomic design

The open-ear design allows you to listen to music or take part in conversations without closing your ear canal, increasing comfort and keeping you in touch with your surroundings. Flexible silicone ear hooks have been tested on more than 20 ear shapes to ensure a stable and comfortable fit - without discomfort. What's more, each earphone weighs only 9 grams, allowing for hours of fatigue-free use, whether at work or during a workout.

Clear conversations and rich sound

The use of 5 microphones with AI-based noise cancellation technology translates into clear and intelligible conversations even in noisy environments. In addition, the 30 mW drivers provide clear, dynamic sound that works whether you're making phone calls, listening to music or playing games.

Long runtime - without unnecessary interruptions

The OneOdio OpenRock Link 20 are designed for long-term use without frequent charging. The headphones offer up to 9 hours of talk time and up to 13 hours of music playback on a single charge, and the included charging case extends this time by 27 or 39 additional hours, respectively. Such capabilities make the set effortless for long meetings, travel, flights or intense work days and workouts.

Smart modes and EQ

The headphones support an intelligent EQ and allow you to quickly switch modes such as work, meeting, entertainment or sports. So you can adjust the sound to the current situation with a single click. Collaboration with the app allows you to further personalize the settings - adjust them to your preferences!

Resilience and reliability for everyday use

Dual sweat- and moisture-resistant construction protects the headphones during workouts or use in changing weather conditions. The physical buttons are designed to prevent accidental presses, while remaining fully functional even when exposed to moisture. What's more, the stable wireless connection works over a distance of up to 30 meters and supports pairing with different devices simultaneously.
