

Canon RF 28-70 mm f2.8 IS STM MILC Standard zoom lens Black

Model: 6535C005

Manufacturer: CANON

EAN: 4549292229134

Product Code: 699326

R28,883

Capture more of what you love every day with this lightweight, compact and versatile standard zoom lens; boasting a fast aperture, image stabilisation and filmmaking features.

SEE THE DIFFERENCE

Empower your creativity with a compact, lightweight and high-quality camera zoom lens that's great for travel, portraits and landscapes. A fast f/2.8 aperture plus 5.5-stops optical image stabilisation makes it great in low-light, and thanks to weather sealing it's a lens you'll want to use every day.

A CLOSER LOOK AT RF 28-70mm F2.8 IS STM

Discover the key features and technologies that make the RF 28-70mm F2.8 IS STM a great travel companion for creatives everywhere.

IS THIS THE BEST CAMERA LENS FOR YOUR MIRRORLESS CANON?

A small, fast and light f/2.8 28-70mm standard zoom for full-frame cameras, with IS and weather

sealing. Great for travel, portraits and everyday creativity.

Discover your creativity with a fast f/2.8 aperture

Take the next step to creative shooting with a fast f/2.8 aperture that encourages you to work in low-light and isolate your subject with beautifully shallow depth-of-field.

Small. Light. Ready to go anywhere

Thanks to the RF mount design and its clever retracting mechanism, the RF 28-70mm F2.8 IS STM is only 92.2mm long and weighs less than 500g. Weather sealing gives it extra protection from the elements.

Capture sharp images with outstanding stability

Shoot steady shots handheld – even with longer shutter speeds – thanks to a powerful 5.5-stop¹ Image Stabilizer. UD and Aspheric lens elements ensure incredible sharpness.

Shoot stills and movies with great control

Take aim at cinematic productions with focus breathing correction and accurate AF, thanks to a whisper quiet STM motor for fast stills and gorgeously smooth focus transitions.

Focus on the moment with intuitive confidence

Make quick adjustments to shutter speed, aperture or ISO while you shoot thanks to the Control/Focus ring. And for full manual control, use the AF/MF/CONTROL switch to put you firmly in charge.
