

SILICON POWER DDR4 8GBx2 1Gx8 3200MHz C16 OC-UDIMM SR w/HS-G

Model: SP016GXLZU320BDI

Manufacturer: SILICON POWER COMPUTER &
COMMUNICAT

EAN: 4713436160601

Product Code: 700590

R4,005

The Silicon Power XPOWER Pulse memory kit provides reliable performance and substantial capacity for demanding applications. With a total storage capacity of 16 GB across two modules, this DDR4 SDRAM transforms your system's multitasking capabilities, making it suitable for both gaming and creative tasks. Its memory speed of 1600 MHz ensures smooth operation, while the Intel Extreme Memory Profiles (XMP 2.0) support allows for enhanced overclocking possibilities.

Crafted with a focus on efficiency, the unbuffered design and 288-pin DIMM form factor make installation straightforward. The combination of CL16 latency and compliance with the PC4-12800 memory specification optimizes performance for various workloads, ensuring high responsiveness. Elevate your computer's performance with this memory kit designed for stability and speed, suitable for casual users and professionals alike.
