NEEWER RGB Handheld Tube LED Light

The NEEWER RGB handheld tube LED light is designed for mobile creators who need a lightweight, convenient, and versatile light source for photography and video recording. Its inflatable design means it takes up very little space when folded, yet extends to a full 90 cm when unfolded, providing soft and even lighting. With 30W of power, a wide RGB color temperature range, 17 special effects, and a built-in battery, you can work freely both in the studio and on location. It's a practical solution for photographers, streamers, vloggers, and anyone who wants to create compelling content without limitations.

Lightweight design built for field work

NEEWER Basic is a series focused on simplicity, functionality, and ease of use without unnecessary frills. This tubular LED light is made of soft TPU material, so once deflated, it can be easily folded and packed into a bag or backpack. Weighing just 377 g, it remains convenient for travel, outdoor

shoots, or work outside the studio. When inflated, it transforms into a full-size 90 cm lamp that effectively illuminates portraits, still lifes, vlogs, live streams, or creative social media content. It's a piece of equipment you can easily take anywhere where quick and convenient setup of a photo shoot is essential.

Powerful light and extensive customization options

The built-in LEDs offer 30 W of power and a brightness of up to 3000 lux at a distance of 0.5 m, making the lamp suitable for both primary and supplemental lighting. Color temperature adjustment ranging from 2700K to 6500K allows you to easily set the mood of the scene—from warm, pleasant tones to cool, more professional lighting. Additionally, you can smoothly adjust the brightness from 0% to 100%, making it easier to work in changing lighting conditions. The high CRI of 95 ensures accurate color reproduction, so your photos and videos retain a natural look and high level of detail.

Ready for action during long shoots

The built-in 7.2V battery with a capacity of 5000 mAh and 36 Wh of energy allows you to use the light for up to 70 minutes at maximum brightness. This is a great solution for dynamic photo shoots, filming events, or recording vlogs outside the studio. The USB-C port supports PD45W fast charging and 30W output, which significantly reduces the time needed to prepare the equipment for the next job. This allows you to conveniently charge the light on the go and continue recording without long breaks. The device's portable nature makes it a perfect fit for creators who work on the move.

Creative lighting effects and convenient operation

SCENE mode offers as many as 17 special effects that let you quickly set the right mood for a shot without needing additional accessories. Effects such as paparazzi, broken bulb, explosion, welding, pulsing light, and CCT flickering help create more dynamic and cinematic footage. It's a great solution for those recording short videos, artistic films, or creative content for social media.

Operation is made easy by the built-in 0.98" color display, which shows all the lamp's key settings in a clear and intuitive way. This allows you to change parameters quickly and conveniently, even during intense work on set.
