

Neewer ST210R 210 cm Carbon Fiber Lighting Stand

Model: ST210R

Manufacturer: NEEWER

EAN: 6976831834500

Product Code: 707794

R2,450

Neewer ST210R 210 cm Carbon Fiber Lighting Stand

The Neewer ST210R is a lightweight carbon fiber lighting stand designed for studio work, video production, photography, and mobile outdoor shoots. The 9-layer carbon fiber construction ensures high rigidity while weighing only 900 g, making the stand convenient for transport and everyday use. The model offers height adjustment from 51 to 220 cm, a load capacity of up to 3.5 kg, and compatibility with 1/4" and 3/8" threads, allowing you to attach LED lights, microphones, grips, ring lights, and other studio accessories. Thanks to its Reverse Folding legs, the tripod takes up less space when folded, making it easier to transport equipment while working in the field.

Lightweight and durable carbon fiber construction

The tripod is made of carbon fiber, which offers an excellent strength-to-weight ratio. The carbon fiber construction helps reduce the weight of the entire setup, which is important during transport and mobile work. The material is also corrosion-resistant and performs well in various weather conditions, so the tripod can be conveniently used both in the studio and during outdoor shoots.

Load capacity up to 3.5 kg

Despite its very low weight, the tripod supports equipment weighing up to 3.5 kg. This allows you to safely mount LED lights, light panels, microphones, small softboxes, or accessories for recording and online streaming. The design is intended for light and medium-weight lighting setups used in creative work.

Compact Reverse Folding

The tripod legs fold upward at a 180° angle, so the entire unit takes up less space when folded than traditional lighting tripods. This solution makes it easier to transport and store the equipment in a bag or camera backpack. This is particularly practical when working on the go and frequently moving equipment.

Universal mounting threads

The tripod is equipped with a 3/8" to 1/4" adapter, which increases compatibility with popular studio and lighting accessories. The model works with LED lights, light panels, microphone stands, and ring lights, among others. Thanks to standard threads, you can easily adapt the configuration to your own equipment setup.

Stable base

Wide-spaced legs and rubber feet improve the tripod's stability on various surfaces. The triangular leg mounting design further stiffens the structure, helping to maintain a stable position when working with lighting equipment.
