Neewer Q200 Flash

The NEEWER Q200 is a compact 200Ws flash designed for outdoor, wedding, fashion, and commercial photography. It offers a stable color temperature of 5600K, a fast flash duration of up to 1/13510 s, and a recycle time of 0.01 to 1.5 seconds, making it well-suited for dynamic scenes. The built-in 3200 mAh battery allows for up to 750 full-power flashes, and support for the mobile app and 2.4G system enables convenient control of the entire lighting setup from a smartphone or trigger.

Precise light control and extensive adjustment options

The flash offers 9 power levels ranging from 1/1 to 1/256, allowing you to easily adjust the flash intensity to suit your shooting conditions. Support for TTL, manual, and MULTI stroboscopic modes provides greater flexibility for both fast-paced photojournalism and more creative photo shoots. The HSS function up to 1/8000 s helps maintain proper exposure when shooting in bright daylight or working with a wide-open aperture. This makes it easier to achieve a naturally blurred background without sacrificing adequate lighting for the subject.

Round head and LED modeling light

The round head provides a more natural and even light distribution than classic rectangular designs. This makes it easier to achieve a soft lighting effect and works better with compatible light modifiers. The built-in 10W LED modeling light can also function as a continuous light during video recording. Brightness adjustment and the ability to change the color temperature within the range of 2700K-6500K make it easier to adapt the light's character to the scene or existing lighting conditions.

Fast Performance and Efficient Power Supply

The NEEWER Q200 is equipped with a high-capacity 14.8V lithium battery with a 3200 mAh capacity, enabling long operation without frequent recharging. Up to 750 full-power flashes are ideal for longer photo shoots or photojournalism. A full charge takes approximately 3 hours using the included docking station. Additionally, the cooling system with ventilation holes helps maintain stable flash operation even during intensive use.

Advanced wireless control system

The built-in NEEWER 2.4G Q system enables operation in Master and Slave modes and remote control of the flash from up to 100 meters away. The model is compatible with QPRO triggers for Canon, Nikon, and Sony cameras, and can also operate with the Godox 2.4G X system in RX mode. Support for groups and channels allows for convenient management of a larger lighting setup when working in the studio or on location. Control via the NEEWER App further simplifies configuration and OTA software updates without the need to connect the device to a computer.

Robust construction and accessory compatibility

The flash housing features a clear, high-resolution display and an intuitive control dial that facilitates quick adjustments while working. A metal mount with an adjustable tilt of up to 135° ensures stable mounting on lighting stands. The model is compatible with many NEEWER Q system accessories, including softboxes, diffusers, and magnetic light modifiers. Thanks to its broad compatibility with Z and NW series lights and select devices from other manufacturers, the Q200 can become a convenient component of a larger lighting system.

Included

- 1 x Q200 Outdoor Flash
- 1 x Metal Mount
- 1 x Lithium Battery
- 1 x Charging Dock
- 1 x Charger Power Adapter
- 1 x Carrying Bag

Manufacturer	NEEWER
Model	Q200
Flash Modes	M/MULTI (wireless off), TTL/M/MULTI (2.4G wireless mode)
Wireless compatibility	Nikon, Canon, Sony
Flash power	200Ws
Flash duration	1/220 s – 1/13510 s
Power adjustment	1/256 – 1/1
Flash delay	0.01 – 30 s
Optical triggering	S1 / S2
Wireless groups	5 (A, B, C, D, E)
Wireless range	up to 100 m
Modeling light	10 brightness levels; 2700K–6500K (±100K)
Stroboscopic flash	up to 100 times; frequency up to 100Hz
Sync modes	HSS (High Speed Sync), first-curtain sync, second-curtain sync
Recycle time	0.01 – 1.5 s
Power supply	14.8V / 3200mAh lithium battery
Battery life	approx. 750 flashes at full power
Charging time	approx. 3 hours
Dimensions	81 x 81 x 220 mm
Weight (with battery)	988 g
