Neewer CB300B BiColor LED Light

The NEEWER CB300B BiColor combines high power (320W), a wide color temperature range (2700K-6500K), and advanced control options, making it ideal for video recording, product photography, live streaming, and professional photo shoots. The bright COB light source delivers an impressive intensity of up to 150,000 lux at a distance of 1 meter, while maintaining natural color rendering thanks to CRI 97+ and TLCI 97+ ratings. The light supports smooth brightness adjustment from 0 to 100%, offers 12 scene effects, and is compatible with popular Bowens-standard light modifiers. The package is rounded out by a quiet cooling system, convenient app control, and a sturdy U-shaped mount that allows for flexible adjustment of the beam angle.

Maximum power and natural colors

The advanced COB light source provides powerful, even lighting without flicker, which is crucial when working with cameras. A maximum brightness of 150,000 lux at 1 meter allows you to —

comfortably illuminate a film set, recording studio, or livestreaming space. Thanks to a wide color temperature range from 2700K to 6500K, you can easily adjust the light's character to match the scene's mood—from warm, cinematic shots to cool, neutral frames. High CRI 97+ and TLCI 97+ ratings guarantee accurate color reproduction, which will be appreciated by photographers, filmmakers, and online content creators who prioritize a professional final result.

BOOSTER mode and quiet operation during recording

The CB300B model is equipped with two operating modes tailored to different usage scenarios. When BOOSTER mode is activated, the lamp utilizes its full 320W power, reaching a brightness of up to 150,000 lux at 1 meter, while the intelligent cooling system automatically ensures proper heat dissipation. In standard mode, the device operates at 80W with a brightness of 45,500 lux at 1 meter using the standard reflector, while keeping the fan off for nearly silent operation. This is an excellent solution for interviews, dialogue recording, podcasts, or other productions requiring a quiet environment.

Convenient control in several ways

The NEEWER CB300B lets you control settings exactly the way you like. Intuitive buttons on the housing allow for quick parameter changes directly on the light, and the built-in 2.4G module lets you synchronize settings across multiple compatible devices operating on the same channel within a range of up to 15 meters. The manufacturer has also ensured support for the NEEWER mobile app, which allows you to manage groups of lights, update firmware via OTA, use the music synchronization feature, and activate lighting effects. The system is compatible with, among others, the NEEWER CB100C, CB200B, FS150B, FS150, MS60C, MC60B, MS150B, BH30S, and CB60B models.

Effective cooling and longer lifespan

Stable and safe operation is ensured by an improved heat dissipation system and a quiet fan, whose noise level does not exceed 28 dB at a distance of 1 meter. As a result, the light does not disrupt work on set and allows for comfortable conditions during audio recordings. The built-in LCD screen displays the device's temperature in real time, and automatic overheating protection helps extend the equipment's lifespan even during intensive use.

Bowens mount and complete freedom in light positioning

The lamp is equipped with the popular Bowens mount, ensuring broad compatibility with softboxes, beauty dishes, reflectors, and other light modifiers. The included reflector with a special internal pattern helps distribute light evenly and increases lighting efficiency. An additional socket for a photography umbrella makes it even easier to expand your studio setup. A sturdy U-shaped handle with a large knob stabilizes the light on a tripod and allows for 360° adjustment of the beam angle, giving you full control over the direction of light while working.

Included

- CB300B lamp
- standard reflector
- protective cover
- power cord
- user manual

Manufacturer	Neewer
Model	CB300B
Material	aluminum alloy
Maximum power	320 W
Maximum illuminance	150,000 lux/1 m
Power supply	100-240 V AC, 50/60 Hz
CRI	97+
TLCI	97+
Dimming range	0-100%
Color temperature	2700 K-6500 K
Scene modes	12
Channels	CH00-99
Dimensions	300 x 206 x 184 mm
