Product Code: 710218

R4,582

NEEWER CB60 RGB 70W CRI 97+ LED Studio Light

Whether you're recording videos, hosting live streams, or creating atmospheric shots for social media, you need lighting that can keep up with your creativity. The NEEWER CB60 RGB offers 70W of power, impressive brightness of up to 18,000 lux at a distance of 1 meter, and a full RGB color palette, allowing you to easily adjust the light to suit the character of any scene. A wide color temperature range, precise parameter adjustment, and as many as 17 lighting effects let you create a professional atmosphere without time-consuming post-processing. Its compact design, nearly silent operation, and compatibility with the Bowens mount make this light perfect for both home studios and on-location work.

Colors that set the mood of the shot

The NEEWER CB60 RGB offers vast possibilities for creating light—from natural tones to intense, cinematic colors. CCT mode allows you to adjust the color temperature from 2700K to 6500K, making it easy to match the lighting to daylight, atmospheric evening shots, or professional studio recordings. HSI mode lets you control the full RGB color range from 0 to 360°, as well as adjust saturation and brightness from 0 to 100%. You also have 17 preset lighting scenes at your disposal, which help you quickly achieve effects resembling police lights, flashes, a TV, or other dynamic light sources without the need for additional post-production effects.

High power and natural color reproduction

With 70W of power and a maximum light intensity of 18,000 lux at a distance of 1 meter, the CB60 RGB works well as both a main and fill light. It's a great choice for recording podcasts, YouTube and TikTok videos, live streams, product photography, or more advanced video productions. High CRI 97+ and TLCI 98+ ratings ensure highly accurate color rendering, which is crucial when working with a camera and during post-production color grading. Skin tones look natural, colors retain proper depth, and the overall result looks professional right from the recording stage.

Smart control and convenient operation of multiple lights

Working with a larger lighting setup becomes much simpler thanks to the NEEWER App and Infinity technology. Using your smartphone, you can simultaneously control the settings of multiple lights from a distance of up to 15 meters and organize them into 8 groups. The Infinity system allows you to control up to 255 devices at once, which is perfect for more complex photo shoots. The built-in 2.4G module and 99 channels also allow you to control the lights without the app—simply set the devices to the same channel so that one light can act as a remote control for other models compatible with the NEEWER system.

Quiet operation and effective cooling during recordings

During audio recording, the quiet operation of the equipment is of utmost importance, which is why the NEEWER CB60 RGB is equipped with an exceptionally quiet cooling system. The fan operates automatically at low speed from the moment the light is turned on, and if the temperature rises, it increases its speed to effectively dissipate heat. The entire process remains virtually inaudible, making the light ideal for interviews, podcasts, or voice-over recordings. An additional overheating

protection mechanism activates when the temperature exceeds 70°C, safeguarding the device during intensive use.

Bowens Mount and Studio Expansion Readiness

The standard Bowens mount and built-in umbrella socket allow the CB60 RGB to seamlessly work with a wide range of light modifiers. Softboxes, reflectors, beauty dishes, or snoots let you tailor the lighting character to a specific project and working style. The lamp mount allows for smooth adjustment of the tilt angle within a 180° range, making it easy to precisely position the light on set. The sturdy aluminum alloy housing ensures the durability of the construction, and the compact size makes the lamp easy to transport and quickly set up for work anywhere.

Included

- CB60 lamp
- standard reflector
- plastic protective cover
- 4 m power cable
- user manual

Manufacturer	Neewer
Model	CB60 RGB
Power	70 W
CRI	97+
