Neewer LT35 360° carbon fiber travel tripod

The NEEWER LT35 from the LITETRIP series is an advanced travel tripod made of carbon fiber that combines light weight with high durability. It weighs just about 1.13 kg, yet safely supports equipment weighing up to 10 kg. It's a great choice for photographers and videographers using DSLRs, mirrorless cameras, telephoto lenses, or video cameras. When folded, the tripod is only 49 cm long and about 5.5 cm in diameter, so it fits comfortably in your hand and easily fits in a bag or backpack. The five-section legs allow for height adjustment from 16.5 to 156 cm, and three leg angle settings (22°, 55°, and 85°) facilitate stable equipment positioning both in the studio and in the field.

Instant switching between backpack and tripod

The LT35 model is equipped with an Arca-type quick-release plate that is also compatible with the Peak Design Capture Clip system. Thanks to the side lock button, you can switch the camera from the backpack strap directly to the tripod in just a few moments, which significantly streamlines work in dynamic conditions. A universal 1/4" screw allows for mounting Canon, Nikon, and Sony cameras, DV cameras, mirrorless cameras, binoculars, sliders, and other photography and film accessories.

Precision ball head for panoramas and vertical shots

The low-profile metal ball head with a 40 mm diameter panoramic base provides greater stability thanks to a lowered center of gravity. It allows for smooth 360° rotation and a quick transition to vertical shots at a 90° angle using a U-shaped notch. The head can be removed and mounted on a monopod, slider, or other tripod with a 3/8" thread. An additional 1/4" thread on the quick-release clamp allows you to attach a preview monitor, LED light, or other accessories.

Phone mount and ultra-low-angle shots

The kit includes a practical 2-in-1 mount that can serve as a smartphone holder and a comfortable hand grip. The adjustable clamp supports phones ranging from 5.2 to 9 cm in width and offers 180° tilt. The built-in cold shoe mount allows you to attach a microphone or LED light. The tripod is also equipped with a short center column, which, together with the reversible design, allows you to take macro photos and shots from as low as 16.5 cm above the ground. The long center column features a practical hook for hanging additional weight, which improves stability when working with heavier equipment.

Included

- Tripod with ball head
- 2-in-1 smartphone mount with grip function
- Short center column
- Panoramic quick-release plate
- 2 L-shaped Allen keys
- Carrying bag
