Product Code: 710228

R2,342

NEEWER DL100 3-Wheel Motorized Camera Dolly with Remote Control

The NEEWER DL100 is a motorized camera dolly designed for capturing smooth cinematic shots, time-lapse footage, and panoramic movements. Its compact design allows for convenient use both in the studio and during outdoor shoots. Thanks to its small form factor, the dolly can be easily transported alongside the rest of your production equipment.

Remote Control and Speed Adjustment

The dolly is operated via a wireless remote control, which allows you to change the direction of travel, adjust the speed, and stop movement from a distance of up to 6 meters. There are three speed levels to choose from, allowing you to match the camera's pace to the specific type of footage being recorded. Built-in LEDs indicate the battery level and the device's current operating mode.

Adjustable Wheels for Creative Freedom

Two wheels with an adjustable angle of up to 90° allow for movement in a straight line or in a circular path. The design is compatible with ball heads, smartphone mounts, and camera sliders, enabling creative tracking shots and motion effects. Standard 1/4" and 3/8" mounting threads ensure broad compatibility with various photography and film accessories.

Lightweight Design with Built-in Power Supply

The DL100 is constructed from aluminum alloy and ABS plastic, providing durability while remaining lightweight. With a maximum load capacity of 3 kg, it supports DSLR cameras, action cameras, smartphones, and compact camcorders. The built-in 1500 mAh battery provides up to 6 hours of operation on a single charge, and charging is conveniently handled via the included Micro USB cable.

Included

- Camera dolly
- Remote control
- Micro USB cable
- Rubber wheel ring
- Allen key
- 1/4" to 3/8" thread adapter
- User manual
