This Canon 75-300mm f4-5.6 zoom is an easy-to-use telephoto lens for beginners, offering huge reach and flexible framing options. It's a dependable lens for those starting out in nature and sports photography, letting you zoom right in to pull distant subjects into view, and it focuses as close as 1.5 meters for frame-filling portraits of people and animals. One of the lightest lenses of its type, the Canon RF 75-300mm F4-5.6 lens is ideal for sports days, travel and family adventures with any EOS R System camera. It's a great choice for our models with APS-C sized sensors, giving you even more telephoto reach and creative possibilities.
