Neewer mount for Sony a7R V/a7R IV/a7 IV/a7S III/a1 camera

Universal protective cage for Sony cameras

The NEEWER B0BP6FQXVJ is a versatile protective cage designed specifically for Sony a7R V, a7R IV, a7 IV, a7S III and a1 cameras. Precision machined from black CNC anodized aluminum, this cage provides solid protection for your camera while keeping it compact and lightweight. Ideal for photographers, vloggers, live streamers and filmmakers, this cage protects the camera from damage while improving the quality of footage taken.

Secure mounting in two steps

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Your camera can be easily mounted with the built-in 1/4" screw and further secured with an anti-rotation pin that is specially designed for the camera strap slot. For even more convenience, there is a magnetically stored 2-in-1 screwdriver under the cage for quick and hassle-free tightening of screws, ensuring the stability and security of your equipment.

A variety of mounting options for accessories

The NEEWER cage offers numerous 1/4" mounting holes that allow you to attach several accessories at once, such as arms, ball adapters, a small microphone or an LED light. Two cold shoe mounts and a 3/8" thread with ARRI locating holes allow you to connect additional accessories such as a top mount or field monitor.

Quickly change settings with the Arca Type base

The cage base is compatible with the Arca Swiss quick-mount system, allowing you to instantly mount your camera to a DJI RS 2/RSC 2/RS 3/RS 3 Pro tripod head or stabilizer. This makes it easy to switch between stabilizer mode for handheld filming and tripod shots.

Full access and flexible installation

With 1/4" threads on the bottom and sides of the cage, you can mount the camera on a tripod, monopod, handheld mount or slider in both portrait and landscape orientations. The cage provides full access to the battery compartment, ports and function buttons, allowing you to freely use the camera without removing the protection.
