Philips N-160 1080p Projector (Dark Gray)

The Philips N-160 is a modern multimedia projector with smart features that combines native Full HD resolution of 1920 x 1080 pixels with brightness of up to 250 ANSI lumens, delivering a clear and detailed image up to 100 inches in size. Autofocus, automatic keystone correction, and digital zoom make setup a breeze, ensuring the image is perfectly suited to the available space. The package includes a Google TV dongle, providing quick access to the most popular streaming services and recommendations tailored to your preferences. The package is rounded out by a built-in 5W speaker, a modern LED light source with a lifespan of up to 30,000 hours, and a compact housing measuring 207 x 171 x 147 mm and weighing 1.23 kg.

Full HD 1080p and a screen size of up to 100 inches

The native resolution of 1920 x 1080 pixels allows you to fully enjoy movies, TV shows, and broadcasts in high quality. The image is sharp, rich in detail, and clear even when displaying

subtitles or presentations. The projector can display an image up to 100 inches in size, turning an ordinary wall into an impressive screen that provides a much more immersive experience than a traditional TV.

Automatic focus and image correction without manual adjustment

The Philips N-160 automatically ensures proper projection alignment. Automatic focus adjustment and automatic keystone correction allow you to quickly achieve a clear and proportionate image, even when the projector isn't positioned perfectly in front of the screen. Additionally, the digital zoom feature allows for precise adjustment of the image size without having to reposition the device.

Google TV included and thousands of hours of entertainment

The projector comes with a Google TV dongle, which provides access to popular streaming platforms and personalized recommendations. All your favorite movies, TV shows, and programs are available in a single intuitive interface, and Google Assistant support makes it easy to search for content and use voice control. It's a convenient solution that lets you start watching almost immediately after connecting the device.

Built-in 5W speaker and easy sound system expansion

The integrated 5W audio system delivers clear sound that works well for everyday viewing. This means you don't have to invest in additional speakers right away. However, if you want an even more immersive sound, you can connect headphones or external speakers via the 3.5mm audio output.

Years of viewing without replacing the light source

The projector uses LCD technology and an efficient LED light source, which ensures natural color reproduction and a long lifespan. Up to 30,000 hours of operation means many years of regular use without needing to replace the light source. This solution combines durability, energy efficiency, and convenience.

Easy device connection and media playback
