Philips N-250 1080p Projector (White)

The Philips N-250 is an advanced multimedia projector that combines a native Full HD resolution of 1920 x 1080 pixels with 250 ANSI lumens of brightness and a high contrast ratio of 3000:1. This allows it to display a clear, detailed image up to 80 inches in size, while maintaining good detail clarity and natural color reproduction. Automatic focus adjustment, vertical and horizontal keystone correction, 4-point corner correction, and digital zoom allow you to achieve a perfectly aligned image

with almost no user intervention. The package includes a Google TV dongle, which provides quick access to popular streaming services, while dual-band Wi-Fi, Bluetooth 5.0, and 2 x 3 W stereo speakers make the N-250 a complete home entertainment center.

Full HD that shows every detail

The native resolution of 1920 x 1080 pixels lets you fully enjoy the quality of movies, TV shows, sports broadcasts, and games. The image is sharp, detailed, and clear, and 4K signal support ensures compatibility with modern video sources. A brightness of 250 ANSI lumens and a contrast ratio of 3000:1 help deliver a well-defined image with clearly visible details.

Perfectly aligned image without manual adjustment

The Philips N-250 automatically focuses and corrects vertical and horizontal keystone distortion. Additionally, 4-point corner correction allows for precise adjustment of the image geometry, even if the projector is positioned at an angle to the wall or screen. The 60-100% digital zoom allows you to reduce the image size without having to reposition the device.

Up to an 80-inch cinema in any room

The projector displays an image up to 80 inches in diagonal, and a throw distance of 70 to 400 cm offers great flexibility in placement. The 16:9 aspect ratio perfectly matches the format of modern movies and TV shows.

Google TV and thousands of hours of entertainment

The included Google TV dongle provides access to popular apps such as Netflix, YouTube, Disney+, and Amazon Prime Video. The intuitive interface organizes content from various services and suggests new movies and TV shows tailored to your preferences. This means your favorite entertainment is available immediately after connecting the device.

Wireless freedom and broad compatibility

Dual-band 2.4 and 5 GHz Wi-Fi enables stable screen mirroring from smartphones, tablets, and computers. Bluetooth 5.0 allows you to connect wireless speakers, headphones, keyboards, mice, and gamepads. It's a practical solution that makes it easy to create a convenient multimedia hub without a tangle of cables.

2 x 3 W stereo and easy audio system expansion

Two built-in 3 W stereo speakers deliver clear and crisp sound for everyday viewing. If you want an even more immersive sound experience, you can use the 3.5 mm audio output or connect the projector to an external speaker via Bluetooth. This makes it easy to tailor the audio playback to your preferences.

Swivel stand and ceiling mount

The 180° swivel base makes it easy to direct the image exactly where you want to watch. The projector supports 4 projection modes, allowing it to operate both on a table and in a ceiling mount. The package includes a metal mounting plate and a set of dowels and screws, making it easy to securely mount the device.

Years of viewing without replacing the light source

The modern LED light source maintains high image quality for over 30,000 hours of operation. This means many years of regular use without the need to replace consumable parts. An additional advantage is low power consumption—52 W during operation and only 0.25 W in standby mode.

Included:

- Projector
- Google TV dongle
- Remote control
- 2 AAA batteries for the remote control
- Metal ceiling plate
- 4 wall anchors
- 4 Phillips-head screws
