GODOX CS-85D Softbox

The GODOX CS-85D Softbox is a versatile light modifier that provides exceptionally soft, even lighting that spreads in all directions. With a wide 270° beam angle, it effectively fills the space with light, reduces harsh shadows, and produces a natural effect in both small rooms and larger photo sets. It's an excellent choice for video recording, live streaming, video production, and photography—anywhere where aesthetically pleasing and uniform lighting of the entire scene is essential.

Universal compatibility with the Bowens mount

The CS-85D is equipped with the popular Bowens mount, allowing it to work with a wide range of flash units and continuous light lights that use this standard, including the Godox SL150II, UL150, and VL series models. The softbox is ideal as the main source of soft light during interviews, for lighting entire rooms, and for professional photo and video shoots, delivering natural and visually pleasing results.

Convenient operation in any conditions

Thanks to its well-thought-out, durable design, you can set up or fold the GODOX CS-85D in just a few seconds. The quick-release mechanism significantly reduces setup time and makes work easier both in the studio and on location. It's a practical solution for creators who expect mobility, reliability, and ease of use without complicated setup, while maintaining high-quality and effective light modification.
