Automatically holds and releases your phone

Place your device on the charger and the clamp will close automatically to hold your phone securely. When your car is turned off, it safely releases your phone.

Rotates smoothly for both landscape and portrait views

The Wireless Car Charger rotates, so you can view your screen in landscape or portrait mode. And it fits securely into your cars air vents to provide plenty of support to hold your device.

Attaches to most types of air vents

The wireless car charger mounts tightly to car air vents of various sizes and shapes. Whether the vents are horizontal or vertical, it attaches easily and holds your phone firmly.
