

TP-Link Omada Hardware Controller

Model: OC300

Manufacturer: TP-LINK

EAN: 1210002611268

Product Code: 756345

R10,709

Centralized Management for

Access Points, Switches, and Routers

OC300, the professional on-premises hardware controller for the Omada Software Defined Networking (SDN) platform, provides 100% centralized management of Omada access points, Omada switches, and Omada routers—all controlled from a single interface.

Hybrid Cloud for Maximum Convenience

Featuring hybrid cloud technology, the Omada Hardware Controller OC300 allows you to remotely control the whole network wherever you are in the world with cloud access. Locally manage devices with the ultimate security and stability.

Industry-Leading Hardware Design

Equipped with an advanced design and the latest chipset, OC300 has enough processing power to support the massive management of your business network. Rackmount/desktop design benefits easier and flexible installation.

Easy and Intelligent Network Monitoring

The easy-to-use dashboard makes it easy to see your real-time network status; check network usage and traffic distribution; receive network condition logs, abnormal event warnings, and notifications; or even track key data for better business results. Network topology helps IT admins quickly see and troubleshoot connections at a glance.

Multiple Factors Guarantee Easier Network Maintenance

WiFi Heatmap Simulator

Generate a Wi-Fi solution by simulating the wireless coverage effect of APs in the actual site. Determine the appropriate number and location of APs according to the coverage requirements.

Visualizable Network Report for Conveniently Summary

Help service providers easily report network service quality to their customers through reports. IT administrators also easily report network operation status through reports.

Batch Management, Multi-Site Management, and Remote Firmware Updates

Improve network maintenance without needing to configure on-site or manage devices one by one.

Powerful Scheduling

Maintain your network easily with more agile and effective processing. No manual tasks required.

Greater Convenience with the Omada App

Remotely access and configure your whole network with a tap of your phone from anywhere in the world.
