Prestige in Motion

The AX120 PRO builds on the legacy of the original AX series, long established as the cooling backbone of MONTECH’s flagship cases and standalone builds alike. This upgraded PRO version refines that proven DNA with enhanced airflow, quieter operation, and radiant design, turning reliable cooling into a showcase of power and elegance.

Radiant Power, Refined Aesthetics

Cooling that looks as good as it performs. With its glowing rim and illuminated fan blades, the AX120 PRO adds visual depth and modern elegance, transforming your system into a showcase.

Superior Airflow, Cooler Hardware

Every curve of the nine-blade design is engineered for maximum airflow and faster heat dissipation. This ensures your PC stay stable even under heavy gaming, streaming, or rendering loads.

Intelligent Cooling, On Demand

With PWM automatic control, the AX120 PRO adjusts fan speed between 600–1600 RPM to match system temperature. The result: quiet operation at idle, powerful cooling when performance peaks.

Built for Longevity

Featuring a durable Rifle bearing, the AX120 PRO offers smoother rotation, less friction, and extended lifespan — giving you years of reliable cooling without compromise.

Whisper-Quiet Strength

Noise shouldn’t come with performance. Thanks to anti-vibration pads, tuned fan blades, and an optimized frame, the AX120 PRO runs at just approximately 25.4 dBA under full load — power you can feel, silence you’ll appreciate.

Flexible Options, Your Way

Available as a single fan or a 3-in-1 pack with hub, giving you the freedom to match any build requirement.
