Space Saving Sound

Stereo Speakers don't need to take up valuable desk space. The Trust GXT 619 Thorne is a gaming-grade sound bar in a small form factor. Clear stereo sound with 12W of peak power and RGB lighting make this sound bar the solution for every gamer that wants to save some space, without sacrificing the gaming experience.

Easy and Solid

The Trust Thorne is made to give you a solid gaming experience the easiest way possible. Just connect the AUX cable to the 3.5mm headphone jack in your PC or laptop and plug in the USB cable for power. That's all you need to do to experience your games in a whole new way. And because of these universal connections, the Thorne works great on your TV, too!

A New Light

Gamers demand the best experience possible. This doesn't just mean good sound quality, it means a great look, too. The Trust GXT 619 Thorne is equipped with adjustable RGB lighting with 6 different

light modes. When combined with this sound bar, you'll witness your games in a whole new light.

Control Within Reach

Thanks to large, illuminated volume control knob on the front of the Thorne, it's easy to adjust the volume without having to look away from your game. You'll always be in control with an easy-to-reach control knob like this, making it a lot easier to enjoy the 12W of peak power (6W RMS) of the stereo speakers inside.
