Imou Bullet 3 3K

The Bullet 3 3K is a QHD outdoor camera with Full Colour night vision. This security camera provides complete peace of mind both during the day and at night. Thanks to its IP67 certification, the Imou Bullet 3 is suitable to face all weather conditions. The Bullet 3 has 4 night vision modes, including Smart Full Color night vision. Smart Full Color mode displays images in greyscale (IR night vision) and as soon as there is motion, the camera activates its spotlights for colour night vision. This outdoor security camera also features AI detection: the camera distinguishes people from vehicles to prevent false alarms. The Bullet 3 3K also features two-way conversation: hearing and responding to what is observed. This security camera can be connected via Wi-Fi (2.4GHz, Dual antenna) or Ethernet.

Image quality

The 3K QHD resolution, or 5-megapixel resolution, offers premium image quality to keep an eye on a front yard, backyard or garage. The applied H.265 image compression technology ensures that high-quality recordings and streams take up relatively little space and thus require less bandwidth. In this way, the available storage space and bandwidth can be used optimally.

AI detection and night vision

The Bullet 3 3K outdoor camera accurately identifies people and vehicles thanks to AI detection. This can prevent false alarms from falling leaves, for example. Experience a practical way of security with this smart outdoor camera. Even at night, this camera offers good security thanks to its 4 night vision modes.

Two-way talk

Thanks to two-way talk, it is possible to both listen and react to an event. This allows anytime, anywhere control of what happens, for example, at the front door or garage. Moreover, the built-in siren can also be manually activated, should an alarm need to be triggered immediately upon detection.

Connectivity

The Imou Bullet 3 uses 2.4 GHz WiFi with a dual WiFi antenna for optimal coverage. There is also the option of wired connection via the Ethernet port.

Installation

Download the Imou Life app (iOS, Android or Windows) and create an Imou account. After logging in, select the “+” sign at the top right of the Imou app to add a camera. Scan the QR code on the camera and follow the steps in the app. Next, select the Wi-Fi network (2.4GHz/5GHz) and make sure the camera is close to the router during the installation process. The camera will be ready to use in no time! For recording images, you can opt for the Imou Cloud service, as well as local storage by using a MicroSD card or an Imou NVR.

Smart features in Imou Life app

- Notification schedule: Set which days and times in the week, the camera may send your notifications.

- Detection area: Choose in which zone you want to receive notifications.
