Aqara Smart Wall Switch H1 – Grey

Make your lighting smart within minutes! Simply swap out your existing light switch for the Aqara Smart Wall Switch (No Neutral, Double Rocker), bind to the hub, and you now have smart lighting! No Neutral wire? No problem! With this Aqara Switch, needing a neutral in your light switch for smart lighting is a thing of the past! Perfect for traditional British homes. The Aqara Smart Wall Switch H1 (No Neutral) is a smart switch that turns on and off the power of lights and other electrical devices. After binding with an Aqara hub, it can implement remote control via the Aqara Home app (iOS/Android), timed control and other functions, and can work with other smart devices in smart home automation.

Features:

- **No Neutral Wire Required:** Simple installation for any home, perfect for traditional UK homes that usually do not have a neutral wire in the wall switch. Thanks to the Aqara no neutral H1 wall switch, this is no longer a problem. Have a neutral wire? Then check out the With Neutral version for additional features such as energy monitoring and Zigbee router (extender) built in.
- **All-Round Compatibility:** Supports most popular voice assistants and ecosystems: HomeKit, Alexa, Google, IFTTT
- **Standalone Functionality:** Functions as a normal light switch as well as being smart, perfect for those family members who aren't quite yet used to having a smart home. No need to worry about blackouts, if someone accidentally switches off the hub, or your Wi-Fi goes down, the H1 wall switch will still work as a traditional light switch.
- **Zigbee 3.0 Protocol*:** Enjoy the benefits of the fastest, most stable, and energy-efficient smart home technology. Better stability and compatibility (more standardized protocol), longer support and more features.
- **Support of Round Wall Boxes:** Apart from 86mm square wall boxes, the H1 also supports round European wall boxes.
- **Premium Build and Metal Frame:** The H1 uses Aqara's flagship, cleaner design preferred by the majority of Aqara's users. The metal frame makes it more rigid and durable.
- **2-Way Setup Support with Wireless Switch H1:** An existing 2-way setup can be upgraded to the smart one using the Wall Switch H1 EU and the Wireless Switch H1, which can be placed both on top of the existing wall box used for a secondary 2-way switch or on any flat surface such as a wall using the provided sticky pad.
- **Convert to Wireless Switch Function:** The button of the switch can be remapped so that you will get an extra "wireless switch" while the light will be controlled by automation.
- **Overheat Protection:** With overheat protection, you can be sure your home is safe and secure.
- **LED Indicator Behavior Setting:** The behaviour of the LED indicators can be configured via the Aqara Home app. From now on, you will be able to choose, if you want to turn it off completely, make it turn on when the switch is on or vice versa. *Not all of these options are available for the No Neutral version.
- **Modular Design:** Switch has two parts: the "relay" part and the "button" module. Button module*** can be upgraded to a different one in the future or in case of malfunction.
