R1,090

Secure what is dear to you with this wifi security camera. Thanks to human detection technology and razor-sharp images, you won't miss a single unwanted visitor. Receive instant push notifications in the app in case of movement or sound and enjoy razor-sharp images, both day and night.

The Wi-Fi camera offers sharp images of no less than 3MP, even in the dark. The night vision mode automatically

switches on when the light level drops, giving you clear visibility in the evening and at night too.

Prevent false alarms

Thanks to the Human Detection function, this camera recognises people, minimising false alarms

caused by, for example, husky animals passing by. So you only receive notifications when it is really

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices

may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or

typographical errors. We recommend checking the current information before purchasing.

necessary.

Instant notification

Thanks to push notifications, you are always immediately aware of what is going on in your home. As soon as the camera detects movement or sound, you will receive an instant notification on your smartphone. So you can immediately see what's going on in the app and - when necessary - take action.

Works with the free Trust WiFi app

Control and monitor your camera very easily with the free Trust WiFi app. Whether you want to watch live view, review recordings or use the camera microphone: you can do it all via your smartphone or tablet, without expensive subscription fees

Built-in siren for optimal security

The Wi-Fi security camera is equipped with a built-in siren that (if desired) goes off automatically upon motion or sound detection. This function can also be operated manually via the app. So you are optimally protected against intruders.
