

Aerocool CS110 Mini Tower Black

Model: ACCS-PC18014.11

Manufacturer: AEROCOOL

EAN: 4711099476824

Product Code: 787153

R1,345

The budget-friendly CS110 is a sleek and compact mini tower case, designed for Micro ATX and mini-ITX motherboards, making it ideal for space-conscious setups without sacrificing performance. Constructed with a durable SPCC body and a steel front panel, it offers robust protection and a timeless black design. This case features versatile storage options, efficient air cooling with a pre-installed 80mm fan, and multiple I/O ports, blending functionality and style for both casual and enthusiast PC builders.

Classic Look

The sleek, classic design ensures this case fits seamlessly into any office or home environment. Its elegant black or white appearance complements your setup, making it a stylish addition to your space.

Compact Convenience

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

This case is designed to be space-efficient, perfect for smaller workspaces and compact setups. It maximizes your space without compromising on the power or functionality of your system.

Durable Build

Constructed with a 0.7mm SPCC body and a robust steel front panel, it offers unparalleled protection for your components. This durable build safeguards your system against daily wear and tear.

Versatile Compatibility

With Micro ATX/mini-ITX compatibility, this case supports a wide range of compact yet powerful systems. It's perfect for builders looking to build a PC without the bulk.

Cooling Efficiency

Designed to accommodate GPUs up to 255mm and CPU coolers up to 138mm, it ensures efficient heat management. This feature allows for the use of key components, keeping your system cool and stable.
