Montech NX600

Unleash Air Supremacy.

Command cooling, command performance. The NX600 is a dual-tower CPU air cooler engineered to dominate thermals while elevating style. Featuring MONTECH’s flagship E28 PWM performance fans and a soldered copper base, it delivers relentless cooling power with whisper-quiet precision — built for gamers and creators who demand control over heat.

Dual-Tower, Maximum Cooling

Two finely tuned fin stacks with 52 × 2 fins, six heat pipes, and dual performance fans ensure massive heat dissipation surface and maximum airflow efficiency. The result: stable, low temperatures even under marathon gaming sessions or heavy workloads.

Solid Contact, Rapid Transfer

The flat copper base soldered directly to six heat pipes ensures even heat conduction across both towers. This design minimizes thermal resistance and keeps your CPU running stable — no matter how intense the task.

E28 PWM Peak Performance Fan

The NX600 equipped with 2× MONTECH E28 PWM performance fans, tuned for airflow and whisper-quiet operation without lighting — the perfect stealth cooling solution.

Sleek Top Finish

A sleek top cover conceals the heat pipe ends and fin stacks, giving the NX600 (ARGB) a clean, unified look that matches any high-end build.

Effortless Compatibility

Compatible with all major sockets, including Intel LGA115X / 1200 / 1700 / 1851 and AMD AM4 / AM5, the NX600 makes upgrading your system easy and worry-free.
