Shifted Modular
PSU**

Model: CP-9020300-EU

Manufacturer: CORSAIR

EAN: 840440485056

Product Code: 800115

R4,490

The CORSAIR RM1000x is a fully modular power supply designed for performance and reliability in PC and server applications. With a powerful output of 1000 W and a maximum current of 83.3 A on the +12V bus, this power supply supports demanding hardware configurations and ensures stable performance. The innovative cooling system, featuring a 140 mm fan with fluid dynamic bearing technology, helps maintain optimal temperatures while operating in Zero RPM mode for silent operation during low loads.

Equipped with advanced protection features such as overheat, overcurrent, overvoltage, overpower, and short-circuit protection, the RM1000x safeguards your system from potential hazards. The incorporation of modern technologies, including LLC resonant converter and DC-DC technology, maximizes efficiency and performance, with an efficiency rating of 89%. The extensive cable management options and multiple connector types provide flexible installation possibilities for a clean and efficient setup, making this power supply a reliable choice for any build.
