EcoFlow Glacier Classic 35l portable refrigerator

The EcoFlow GLACIER Classic Portable Refrigerator is ideal for camping, campervans, tent outings, spontaneous barbecues and even shopping on a hot day. Thanks to its compact design, it will easily fit in the trunk, for example, and its 35-liter capacity is enough to store up to 58 cans of beverage. The device also allows you to choose between cooling and freezing modes - it will ensure freshness for products such as yogurt, vegetables, fruits or meat. In addition, the refrigerator can be powered in several ways - including from an AC outlet, in the car or using an additional battery (sold separately).

Cools or freezes - the choice is yours

The 35-liter refrigerator offers a single zone that can operate in cooling or freezing mode. This means you can easily adapt it to your needs and safely store meat, beverages or even ice cream in it. Precise sensors stably maintain the right temperature with an accuracy of $\pm 1^{\circ}\text{C}$, so the food placed inside stays fresh for a longer period of time.

Just right for any trip

The GLACIER Classic 35 l model was designed with travelers and more in mind. Its compact design (70.6 x 40 x 40.5 cm) allows you to save space in your trunk or camper, while still accommodating everything you need - from drinks to snacks to other food items like cheese or yogurt. The refrigerator is about 40% smaller than standard units of similar capacity, yet it can easily fit as many as 58 330 ml cans of beverage.

It will prove itself in many applications

GLACIER Classic refrigerator will prove itself wherever reliability and convenience are important. You will successfully use it during camping, campervan trips, family vacations or long car trips, as well as at the allotment or barbecue. You can also take it on a shopping trip on a hot day to make sure that ice cream, vegetables or frozen food gets home safely. Thanks to its compact design, the device will fit into most trunks.

Several power options

With several available power options, the GLACIER Classic refrigerator will work in almost any conditions. You can simply plug it into an AC outlet, a car charger or your vehicle's alternator (the product is compatible with EcoFlow Alternator Charger 500 W and 800 W). The device also works with photovoltaic panels (11-30 V, less than 110 W) - but in this situation you must use an additional battery (sold separately). You also have a USB-C port, which allows you not only to power the refrigerator, but also to charge selected devices, such as a smartphone or laptop, for example.

Wireless operation with an additional battery pack

A rechargeable battery available for sale separately allows the refrigerator to operate wirelessly. With a capacity of 298 Wh, it can power the device for up to 43 hours! Such a solution will be great

in case of a power failure or during trips to places where access to standard energy sources is difficult.

Excellent insulation, impressive performance

Forget about melting ice and flooded packages. Thanks to a 53-millimeter layer of insulating foam and a tight seal, the GLACIER Classic stably maintains the right temperature. In addition, an efficient compressor ensures low energy consumption and allows the refrigerator to operate efficiently for a long time.

More possibilities with the EcoFlow app

With the EcoFlow app, you can conveniently control the temperature, monitor the battery status, check the last 7 days' data and use the available modes. Max mode provides cooling with maximum efficiency - it will work well for ice cream or frozen meat. Eco mode, on the other hand, reduces energy consumption, so it will be perfect for longer trips. The app will also send you notifications of any abnormal temperature fluctuations.

Convenient portability

There are hidden handles on both sides of the refrigerator with a width of 26.7 cm, which allow it to be carried comfortably and safely by two people - even when the interior is filled with food and drinks. They can withstand a load of up to 100 kg, so you don't have to worry about damaging them.

Additional accessories for every adventure

Also available for sale separately are additional accessories that increase the functionality of the refrigerator during expeditions. A detachable board allows you to conveniently store tools, spices or handy trinkets, and a folding table will successfully serve as a cutting board, for example. In turn, a practical bag will allow you to organize cutlery and other small items. This is a great option for anyone who wants to have everything necessary in the field at hand!
