Ecoflow Travel Shower Kit

The EcoFlow Shower Kit is a versatile shower kit made for camping, traveling and for people who are often away from home. The kit includes a lightweight, collapsible bucket, shower pump, hose with tips, shower head and power cord. The compact design and light weight make the set easy to carry and ideal for any field conditions. What's more, the shower is compatible with portable air conditioners from the EcoFlow WAVE series - allowing you to use the condensed water, for example, to wash your hands, dishes or car in outdoor conditions.

Space-saving and convenient

A folding bucket made of durable material is a solution that significantly facilitates transportation and storage of the set. When folded, it takes up minimal space in a suitcase, bag or trunk, and when unfolded, it offers enough capacity for comfortable use of a shower or other water application in the field.

Mobility and efficiency

The kit includes a powerful pump that can be easily powered by the included cord, such as from a powerbank. Combined with the flexible hose and ergonomic shower head, it allows you to create a full-fledged shower anywhere - from camping to the beach. It's the perfect solution for a quick refreshment after a busy day in the field.

Power from the EcoFlow WAVE air conditioner

One of the biggest advantages of the EcoFlow Shower Kit is its ability to work with WAVE series portable air conditioners. This allows you to use the condensation water collected by the unit - a perfect solution in situations where access to water is limited. It's a practical and eco-friendly approach to saving water while traveling.

Included

- Collapsible water tank (bucket)
- Power pump
- Water pump with handle
- Shower hose
- Shower head
- Power cord
