

RainPoint 1- Zone Irrigation Controller with App

Model: TTV103FRF + TWG004WR

Manufacturer: RAINPOINT

EAN: 5907085528533

Product Code: 805804

R1,776

RainPoint 1-zone irrigation controller with app

RainPoint is a smart, single-zone irrigation controller that makes it easier to care for your garden. The device is designed for a plug-and-play outlet, and thanks to remote control via the app, you can set up to three watering schedules for a selected zone, choose between intensive irrigation and a gentle mist, and pause watering in case of rain. A sturdy, IP54-rated waterproof housing and a filter that removes impurities ensure reliability for years to come, while the built-in flow meter and notifications about low battery levels and potential leaks will help you monitor water usage. Plus, automatic watering based on a soil moisture sensor and local weather forecasts saves you time and water. See for yourself how easy it is to have a lush, green garden!

Remote control

Thanks to the included hub (model TWG004WR), you can expand the system with additional devices and also use it as a regular Wi-Fi outlet. The RainPoint Tuya app, available on iOS and Android, lets you water manually (turn the water on and off from the app, setting any operating time for the valves), set schedules (a selected zone can have up to three independent daily programs with different start times and watering durations), and manually or automatically pause the schedule during rain.

Two modes for optimal plant care

The device offers two modes, including irrigation mode (a strong water stream for deep root irrigation) and mist mode (a gentle, cooling mist, ideal for plants requiring delicate care). Set up different watering schedules for your lawn, flower beds, or vegetable patches and enjoy perfect moisture levels in every corner.

Automation based on weather forecasts

Connect an optional soil sensor (up to 2 sensors per controller) and let the system water your plants automatically when it detects a drop in moisture levels. What's more, the built-in water flow meter records usage over the past 10 days, and the app will notify you of low battery levels, as well as malfunctions or leaks.

Thoughtful design

The controller's housing is IP54-rated, making it resistant to dust, splashes, and UV radiation. The device is designed for a pinless outlet, ensuring a convenient and secure connection at the installation site. The filter integrated into the device removes up to 35% of impurities and withstands water pressure of up to 35 kg/cm². The sealed battery cover prevents moisture from entering the interior.

Included in the set

- Irrigation controller
- Hub
- Mounting tape
