

RainPoint 2-zone irrigation controller with app

Model: HTV210B + HWG009WB

Manufacturer: RAINPOINT

EAN: 5907085528564

Product Code: 805806

R2,128

RainPoint 2-zone irrigation controller with app

Meet the RainPoint irrigation controller - your reliable assistant for watering your garden! Remote control via Smart Hub will put you in control of watering from anywhere. Choose from two watering modes and set up to six schedules. Robust, waterproof housing (IP54), universal connections and battery operation guarantee reliability in all conditions. The dedicated app additionally presents the weather forecast and the time of the next cycle, so you can easily adjust the schedule to current conditions. Invest in RainPoint and enjoy a lush, well-kept garden effortlessly!

Smart watering scheduling

With the RainPoint Tuya mobile app, you can easily manage your garden's watering schedules. Set watering delays for 24, 48 or 72 hours and be sure that rains or heavy precipitation will not interfere

with your watering schedule. The app shows current meteorological conditions and the time of the next scheduled cycle. This allows you to quickly modify your watering schedule based on the weather forecast.

Water your entire garden

The controller supports two irrigation zones, allowing you to customize individual watering plans for different parts of your garden. Each perimeter has its own plan (start time, duration and frequency of cycles), so flower beds, lawns or flower beds will always receive the perfect amount of water. In addition, you can choose from two watering modes - the irrigation mode is classic watering, where you set the start time, duration and frequency of watering, while the interval (mist) mode allows cyclic spraying of plants with precisely adjusted misting times and intervals in between (ideal for young seedlings and sensitive plants).

Even more possibilities

Pairing with a controller allows you to create a comprehensive irrigation system. You can set up to six irrigation schedules. You can also connect the controller to the included Smart Hub to control irrigation from anywhere in the world. This way your garden will always be taken care of, even when you are away from home.

Thoughtful design

The easy-to-read LED indicator and timer button allow you to quickly start the cycle manually. Water connectors fit both 1" (input thread) and 3/4" (input/output) threads, with the ability to fit standard installations. The unit's compact design offers IP54 water resistance and support for temperatures from 3 °C to 50 °C, ensuring reliability in all conditions. The controller is powered by 4 AA batteries (not included), eliminating the need to run power cables. This ensures easy installation and the freedom to place the device anywhere in the garden.

Included

- HTV210B irrigation controller
- smart hub HWG009WB
