

QOLTEC 52470 Mobile charger for EV 2in1 type2 3.5kW 230V

Model: 52470

Manufacturer: QOLTEC

EAN: 5901878524702

Product Code: 805833

R3,590

Discover the Qoltec EV charging station, a versatile and efficient solution for your electric vehicle charging needs. This Level 2 EVSE device is designed to provide quick and reliable charging with a power output of 3.5 kW and AC 230 V voltage. Its durable, water-resistant polycarbonate build, rated IP65, ensures it can withstand various environmental conditions, making it ideal for both home and commercial use.

Safety is paramount with this charging station, featuring ground fault protection, overcurrent protection, overvoltage protection, and short circuit protection to ensure a safe charging process. The user-friendly LCD display, adjustable charging current, and delayed start function enhance the charging experience, offering convenience and flexibility. With its wall-mountable design and a 5 m long output cable, installation is straightforward, providing you with various placement options to suit your space.

Product Description: Qoltec EV charging station - 2-in-1, 230V - IEC 62196 Type 2 - 3.5 kW | Product
