Product Code: 805890

R1,700

FREEWELL filter set for DJI Mavic 4 Pro Gradient (2pcs)

Freewell Gradient filters are designed for shots in high-contrast conditions - for example, when bright skies stand out strongly against darker landscapes. The set includes two filters, GND0.9 (3 stops) and GND1.2 (4 stops), which help equalize exposure between the upper and lower parts of the frame for a natural balance of light.

Refined to the last detail

With precision optics and high-quality glass, the filters guarantee sharp images and accurate color reproduction without unwanted distortion. The design is engineered to sit firmly on the DJI Mavic 4 Pro drone, without affecting the operation of the gimbal and ensuring smooth footage even during dynamic maneuvers.
