Hohem Microphone (2TX + 1RX +Charging Case) USB-C

The Hohem MIC-01 is a compact wireless microphone system that will work wherever mobility, convenience and clear sound are important - from vlogging to live broadcasting to recording music and podcasting. The kit includes two transmitters (TX), one receiver (RX) with a USB-C port and a charging case, allowing up to 20 hours of use without plugging in a charger. The microphone offers 48kHz recording, automatic voice equalization, DSP noise reduction and real-time monitoring, resulting in great sound quality no matter the conditions.

Recording and backup straight to TF card

With the Hohem MIC-01, you have the ability to record audio directly to a TF (microSD) card. The built-in slot in the transmitter allows you not only to backup audio, but also to use the device as a

standalone recorder. Recordings are saved in WAV format, and you can access them via a card reader or cable. Note: It is worth remembering that only the FAT32 file system is supported, and failure to export recordings may result in overwriting.

Surround sound without distortion

The microphones on the Hohem MIC-01 record sound omnidirectionally (360°), which means they capture voice well regardless of positioning relative to the source. This is useful in dynamic situations such as interviews or recordings on the move. The DSP noise reduction works at three levels, so you can easily adjust it to the conditions - both indoors and outdoors. The -38 dBFS characteristic and 20 Hz - 20 kHz bandwidth provide natural voice reproduction with a minimum delay of 25 ms.

Long operating time and recording while charging

Each transmitter operates for 7.5 hours, and together with the charging case you gain up to 20 hours of operation. The case is lightweight, compact and charged via a DC 5V port. Importantly, thanks to the USB-C connector, you can use the receiver while charging your phone at the same time. It's ideal for creators who need equipment ready for long recording days.

Small, lightweight and ready to go

The transmitters and receiver weigh less than 15 grams and have a clip and magnetic attachment, so you can easily clip them to your clothing. The system turns on automatically when connected and requires no setup. One-button quick mute, 5-position sensitivity control and live listening via headphones mean you're always in control of your recording. With Reverb mode, you'll improve the sound of your voice, and playback of the recording is possible even without unplugging the receiver - all to save your time and energy.

Included

- 2x Transmitter (TX)
- 1x Receiver (RX)
- Charging case

Manufacturer Hohem

Manufacturer code MIC-01_TypeC

Charging case

Dimensions 80×64×30.6 mm

Weight 76 g

Input DC 4.8-5.4 V

Charging time approx. 1,5 h

Battery capacity 850 mAh

Transmitter (TX)

Dimensions 50.2×20.6×20.6 mm

Weight 14.9 g

Receiver (RX)

Dimensions 46×23.5×9.1 mm

Weight 5 g
