Hohem iSteady V3 Ultra Gimbal (white)

Hohem iSteady V3 Ultra is a compact but extremely advanced gimbal with built-in AI tracking and 3-axis stabilization, designed for self-shooting, vlogging, content creation and live streaming. With it, you no longer need a camera operator - you will prepare everything yourself.

Intelligent tracking

The built-in AI tracking system recognizes not only the face, but also people in motion, animals, vehicles and other objects. Importantly, it works directly with your phone's camera - whether you're using iOS, Android, or recording via TikTok, Instagram, YouTube or other apps. You don't need additional software or fiddling with settings.

Simple gestures, quick control

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Just raise your hand or make a simple gesture to start tracking, stop recording, take a photo or change the orientation between landscape and portrait. This is a huge convenience when you're working - especially in situations where you can't touch the screen when recording from a distance. You can also use the included remote control.

Stability you can rely on

The gimbal uses the iSteady 9.0 algorithm and 3-axis stabilization system to ensure smoothness even during dynamic movement. Whether you're walking, dancing, jumping or recording from a bike, your shots are stable and look like they were shot on professional film equipment. Advanced technology compensates for any shake or position changes, even if the device is held at an angle or changes direction quickly.

Detachable screen with live view

An integrated remote control with a 1.22-inch touchscreen is something that sets this model apart from the competition. You can detach it and gain as much as 10 meters of control range. This allows you to see the frame in real time, even when filming yourself with the rear camera, which is usually impossible without the assistance of a second person. This is ideal for individual vlogging, but also for group work - because you can remotely set up the shot and see who fits in the frame.

Intuitive control without apps

The touchscreen remote control gives you quick access to all the most important functions - from turning on tracking, to changing light settings, to selecting recording mode. You don't have to reach for your phone, turn on apps or remember complicated shortcuts. Everything is at your fingertips, clear and ready to go - even if you're using the device for the first time.

LED lamp

The integrated LED lamp with remote control is a great addition to the whole set. You can choose from three color temperatures (warm 2700 K, neutral 5000 K, cold 6500 K), adjust the light intensity (from 1 to 100%) and easily illuminate the area even in difficult conditions. The light works smoothly - no flickering or "overexposure" effect. It is ideal for night recordings, vlogs at home, as well as

professional presentations.

Ideal for individual work and with a team

The iSteady V3 Ultra works great both alone and in a group. With the built-in boom (20.5 cm), you can easily capture a wider frame - perfect for group photos and videos. The expandable tripod allows you to stably position the gimbal on any surface, and the universal ¼" thread allows you to attach it to additional accessories, such as a photo tripod. This allows you to film from different heights and angles of your choice.

Durable battery

With a 2600 mAh battery, the gimbal runs for up to 9 hours on a single charge (or 6 hours with active tracking and LED flash). That's enough to record all day - on the road, at events, during live broadcasts or photo shoots. You don't have to worry about charging while you're working.

Dedicated app

With the Hohem Joy app, you gain access to video templates, composition prompts and ready-made video effects. You can select a scene, press "Start" and the gimbal will take care of the camera movements, transitions and smoothness of the video itself. This is a huge help for beginners and a great tool for those who want to create faster and more efficiently. Effects such as dolly zoom, panorama and inception are now at your fingertips.

Included

- Hohem iSteady V3 Ultra
- USB-A to USB-C charging cable
- Allen wrench
- storage pouch
- user manual

Gimbal

Weight	428 g (±5 g)
Material	High quality composite material with improved durability
Dimensions when unfolded	127 × 65 × 312 mm
Dimensions when folded	98 × 44 × 160.5 mm
Maximum load	400 g
Phone width	58 mm - 98 mm
Battery	18350 lithium-ion, 7.2 V / 11.52 Wh
Typical capacity	1600 mAh
Rated capacity	1550 mAh
Charging time	2.5 hours (with 5 V 2 A charger)
Operation time	About 9 hours (with stable and balanced operation); About 4 hours (with simultaneous use of AI tracking and lamp)
Power consumption	1.55 W (approximate value, measured under ideal conditions)
Control range	Horizontal rotation (pan): 360° - unlimited; Rotation along axis (roll): -195° to +135°; Tilt (tilt): -35° to +45°.
Motor protection	The gimbal will automatically shut down if a malfunction is detected to protect the motors.
Operating temperature	-10°C to 45°C

Remote control

Battery capacity	3.85 V / 140 mAh / 0.539 Wh
Control range	Up to 10 meters
Video transmission range	Up to 10 meters
Touch screen	1.22 inches
