

10.1 Shelly Wall Display XL WiFi/BLU Control Panel (Gray)

Model: WallDisplayXLG

Manufacturer: SHELLY

EAN: 3800238071691

Product Code: 806639

R7,396

Shelly Wall Display XL 10.1" WiFi/BLU Control Panel (gray)

The Shelly Wall Display XL is a wall-mounted control panel with a 10.1" touchscreen display and built-in relay, designed for device operation and integration in modern residential and commercial installations. It provides lightning-fast response thanks to a quad-core processor, offers four fully customizable buttons, connects via Wi-Fi 6 (2.4/5 GHz) and Bluetooth 5.4, and supports media playback and Internet radio. Its added advantage is mounting in a standard wall box and remote management via the Shelly Smart Control app. All this makes the device perfect for homes, apartments, hotels or offices.

Touch screen and powerful processor

The 10.1" HD color display with responsive 5-point touch panel (G+FF) and 1280×752p resolution provides a clear image and intuitive control. It allows you to use large tiles, widgets and device groups, and is easy to use even for guests or children. In addition, a quad-core CPU (Rockchip RK3566 Cortex-A55), 2 GB RAM and 16 GB Flash memory running on Android 11 guarantee instant panel response, fast screen switching and scene reliability. Forget about stuttering and lags!

Convenient device control

The built-in relay allows you to directly control devices up to 1,500 watts - perfect for lamps, fans and more. You'll also have four fully customizable buttons to assign your favorite functions, such as turning off all lights, opening a lock or starting a scene. Physical control is convenient for homebuyers and guests - no apps or logins. In addition, the panel supports Home Assistant, MQTT and Webhooks, so you can easily integrate it into your smart home ecosystem and join existing automations. At the same time, full compatibility with the Shelly Smart Control app allows you to remotely control devices, create smart scenes and much more. Now, with just a few clicks, you can turn off the lights or adjust the air conditioning settings - even when you're out with friends or at work.

View room energy consumption

The dashboard allows you to monitor your room's energy consumption (from your Shelly Smart Control account) and provides readings from connected Shelly PM meters (sold separately). This makes it easy to identify the devices that consume the most electricity, which will help you change your habits and start saving on your bills!

Scenes, schedules and automations

Create and trigger scenes with a single touch or physical button. Schedules (up to 20) and Webhooks (up to 20, 5 URLs per hook) are available, making it easy to build complex scenarios. Make the fan turn on when the room temperature exceeds a certain threshold, and the lights turn off when you go to bed!

Multimedia and Internet radio at your fingertips

Built-in 2×2 W stereo speakers and an integrated media player and Internet radio allow you to play music, notifications or alarms. The panel also works with Bluetooth and Sonos speakers. Control the listening right from the screen or with the buttons and enjoy your favorite songs wherever you are - in the kitchen, bedroom or living room.

Manufacturer	Shelly
Model	WallDisplayXLG
Dimensions (H × W × D).	155.8 × 272.5 × 38.3 mm
Weight	920 g
Touchscreen	5-point capacitive, G+FF
Screen resolution	1280 × 752 px
Maximum clamping torque	0.4 Nm
Cable cross section	0.2-2.5 mm ² / 24-14 AWG (solid, wire, sleeves)
Wire stripping length	15 mm
Mounting	Wall box (EU standard)
Housing material	Metal, PC coated, glass
Case color	Gray
Speaker	2 × 2 W
Operating temperature	From -20°C to 40°C
Operating humidity	30%-70% RH
Maximum operating altitude	2000 m
Power supply	100-240 V~ 50/60 Hz
Power consumption	15 W
USB-C power supply	5 V□ / 3 A
Power button	1 button (screen on/off)
Function buttons	4 configurable control buttons
Maximum switching voltage	240 V~
Maximum switching current	5 A
AC output	100-240 V~ 50/60 Hz

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

USB-C output	5 V□ / 0.5 A
Internal temperature sensor	No
Ambient temperature sensor	No
Humidity sensor	No
Light sensor	Yes
Microphone	Yes (four-microphone array)
G-sensor	No
Proximity sensor	Yes (≤ 1 m)
Wi-Fi	Wi-Fi 6 Dual Band
Wi-Fi RF band	2.4 GHz and 5 GHz
Maximum RF Wi-Fi power	20 dBm
Wi-Fi range	Up to 30 m indoors / up to 50 m outdoors (depending on conditions)
Bluetooth	5.4
Bluetooth RF bandwidth	2402-2480 MHz
Maximum Bluetooth RF power	4 dBm
Bluetooth range	Up to 10 m indoors / up to 30 m outdoors (depending on conditions)
Processor	Rockchip RK3566 Quad-core Cortex-A55
RAM	2 GB
Flash memory	16 GB
Operating system	Android 11
Schedules	20
Webhooks (URL shares)	20 (up to 5 URLs per webhook)
Scripts	No
MQTT	Yes
