R12,320

Mobile workstation for xTool P3

The xTool mobile workstation is a sturdy stand designed specifically for P3 laser engravers. Thanks to its steel construction with a load capacity of up to about 200 kg, it provides full stability during operation and minimizes vibrations that could affect the precision of cutting or engraving. It is also equipped with sturdy casters that make it easy to move. It's ideal for professional workshops!

Stability and lifting capacity of up to 200 kg

Construction made of thick steel guarantees maximum rigidity and resistance to vibration. The table supports a weight of up to about 200 kg, so it can easily carry the xTool P3 laser engraver and its accessories. The stability of the workstation translates into repeatability and precision during engraving.

Mobility and full motion control

Four sturdy casters allow the table to move freely in any direction, do not scratch the floor and guarantee smooth, quiet movement. This makes it easy for even one person to move the laser engraving machine, adjusting the layout of the workstation to suit current needs. The 360° rotation function makes it easy to maneuver, and the locking mechanism allows you to instantly immobilize the workstation in the desired location.

Expandable and customizable

The table has been equipped with mounting holes for the installation of an additional shelf, which allows you to create a workstation perfectly tailored to your individual needs. It's a solution that helps you stay organized, provides quick access to the most frequently used tools and makes maximum use of the available space.

Manufacturer xTool

Model P0102000110

Material Steel

Load capacity Up to 200 kg

Castor lock Yes

Expandable Yes, mounting holes for shelf
