

Flytec V802 12000mah bait boat (black)

Model: V802 black 12000

Manufacturer: FLYTEC

EAN: 5907085528922

Product Code: 806787

R3,327

Flytec V802 12000mah bait boat (black)

Flytec V802 is a bait boat that combines large capacity, precise control and stable operation even in difficult conditions. It is equipped with four independent chambers with a total capacity of up to 3 kg, allowing a variety of baiting in several places at the same time. Dual antennas, a gyroscopic system and powerful motors guarantee reliability and full control over the route, even in wind and waves.

Four bait chambers

Four independently controlled silos hold a total of up to 3 kg of bait. You are free to plan and drop different mixtures - from grains to pellets to loose bait - at selected points in the fishery.

Stable signal and long range

The dual antenna combined with the high-frequency transmitter provides a stable control signal over a distance of up to 500 meters. The lack of interference allows safe use even on large bodies of water.

Powerful drive and propeller protection

Two powerful electric motors ensure stable and smooth propulsion. The propellers have been protected with anti-tangle guards to keep out seaweed and other debris. A built-in gyroscope system automatically corrects the course to keep the boat going straight despite waves, wind or a full load. This gives you confidence that your bait will go exactly where you planned.

Long operating time

The boat is equipped with a 7.4V lithium battery with a capacity of 12,000 mAh, which allows about 4 hours of continuous operation. The spacious battery compartment allows you to mount a second component to further extend the operating time - ideal for a full day of fishing.

Intuitive remote control

It is controlled by a remote control with a joystick, which makes it possible to operate each of the four chambers, the headlight and taillights. In addition, the Cruise mode allows you to maintain a constant cruising speed without having to constantly operate the joystick.

Safety at night

A front LED headlight and rear lights in blue and red guarantee the boat's visibility after dark and in difficult weather conditions. The taillights also serve a signaling function, informing of the unit's operating status.

Durable hull and additional features

The hull is made of strong and waterproof ABS plastic. The boat is wind resistant (up to 5 degrees Beaufort), and its sealed construction protects the electronics from water. A hook has been placed in the rear for towing a fishfinder or a set of hooks, increasing the functionality of the model.

Included:

- Bait boat
- Remote control
- 7.4V 12,000 mAh lithium battery pack
- USB charger
- Antenna ×2
- Propeller ×2
- Control lever for remote control ×2
- Mounting screw
- Transport cable
- Instruction manual

Manufacturer	Flytec
Model	V802 black 12000
Load capacity of the bait	up to 3 kg
Boat dimensions	52,7 × 26,4 × 50 cm
Material	ABS
Weight	2219 g
Motor	390 electric
Control range	up to 500 m
Battery	7.4V 12,000 mAh
Operating time	approx. 4 hrs.
Charging time	approx. 8 hrs.

Power supply for the remote control 2 × AA battery (not included)
