R2,402

Darkflash DY460 computer case (White) + 4 ARGB fans

The Darkflash DY460 case will allow you to build not only a powerful, but also a great-looking computer. It combines tempered glass panels with a vertical dual-chamber layout, so you can install many different components in it and display them in an interesting way. The model allows rear mounting of selected motherboards, provides space for heatsinks up to 360 mm, and has a built-in USB-C 3.2 Gen 2 port. The compact dimensions (452 x 238 x 541 mm) hide a spacious compartment that can accommodate a graphics card up to 400 mm long and CPU cooling up to 185 mm high. In addition, you'll find four ARGB fans included.

Unprecedented cooling performance

The case allows the installation of up to 10 120 mm fans, providing excellent airflow for the most demanding components. It is also possible to install a 360 mm heatsink on the top or 120/240 mm on the rear. Also noteworthy are the numerous ventilation holes. All this means that you can play AAA games or use demanding software without worry - your computer will not overheat. The kit includes four ARGB fans.

Wide expansion possibilities

Build a computer perfectly suited to your needs. The Darkflash DY460 case allows you to install a graphics card up to 400 mm horizontally or up to 385 mm vertically (using optional mounting accessories, which are not included). You can also accommodate one SSD and two HDDs. In addition, back-connect mounting of ATX and M-ATX motherboards is possible, which simplifies cable management and improves the aesthetics of the entire setup.

Useful ports

The built-in USB-C 3.2 Gen 2 port with up to 10 Gbit/s enables lightning-fast data transfers - useful for graphic designers, video editors, photographers and more. In addition, you'll find USB-A 3.0 and HD Audio connectors on the case, as well as Power and Reset buttons. This makes using the computer convenient and hassle-free!

Delightful design

Tempered glass on three sides of the case provides a 330° panoramic view of the computer's interior, perfectly displaying selected components - such as those with RGB backlighting. Such a solution makes each configuration a real desktop ornament. What's more, the case was created from durable 0.8 mm thick SPCC steel and is effectively protected against dust - it will serve you well for many years.

Included

- Computer case
- Fan x4
